REFRION

Refrion divides its production activities between its two plants in the region of Friuli, one in Talmassons (production of dry coolers and remote condensers) and the other in Villa Santina (production of heat exchangers).

REFRION KÄLTETECHNIK

Is located in Hermagor (Austria) and is specialized in the production of heat exchangers for the refrigeration sector.

RMS

Is a well-established company that designs and processes metal components.

Refrion's air-cooled equipment division has been [certified by TÜV](#).
